

TAKING TRADITIONAL VIDEO SURVEILLANCE TO THE NEXT LEVEL

VIDEOLOGIX (VL)

VL is a recognition and tracking system set to provide alerts only when pre-determined criteria, parameters and triggers are met. These alerts can save you time and money as they will directly show you the video of the possible infraction.

Videologix is a reliable built-in analytic software that works in real-time and seamlessly integrates with the i3 VMS.

Examples of elements recognized by VideoLogix:

	Criteria	Parameters	Triggers
	Human	Enters, stops in area	VPC
	Vehicle	Idles in area	Audio
	Human or Vehicle	Missing or Moving from area	Mobile App
	Any Object	Crosses lines	Alert Center
